CHILD PANELS

Happiness at work

DESIGNED FOR  DANISH STANDARDS

Child panels

Child panel walls

Attractive fabric-covered noise panels for division in all types of rooms.

Xsystems' child panel walls are revolutionary in several ways in both materials and construction. The materials are recycled plastic fibers from, among other things, bottles that have been turned into a noise-absorbing felt.

The felt is covered with a fine cotton fabric in muted colors, which together helps to create a quieter working environment in the room.

Child and floor panels

With the rounded Velcro pads on the floor panels, it is easy to form different angles between the panels. Thus, you can create zig-zag patterns as well as 90° angles between the panels. In this way, it is possible to create shielding for the children in a way that allows staff to keep an eye on them.

The children get a place where they can find tranquility and immersion, but can still make contact with the rest of the room when they rise within the panels. Mounting wheels on the feet, it is also easy to redefine these spaces, simply by moving the panels to a new position.

The panels are stable and made of a light but strong material. They are easy for staff to move, assemble, and disassemble, and take up no space when placed against a wall, for example.

Choose between wheels or fixed feet on the bracket. All included wheels can be locked.

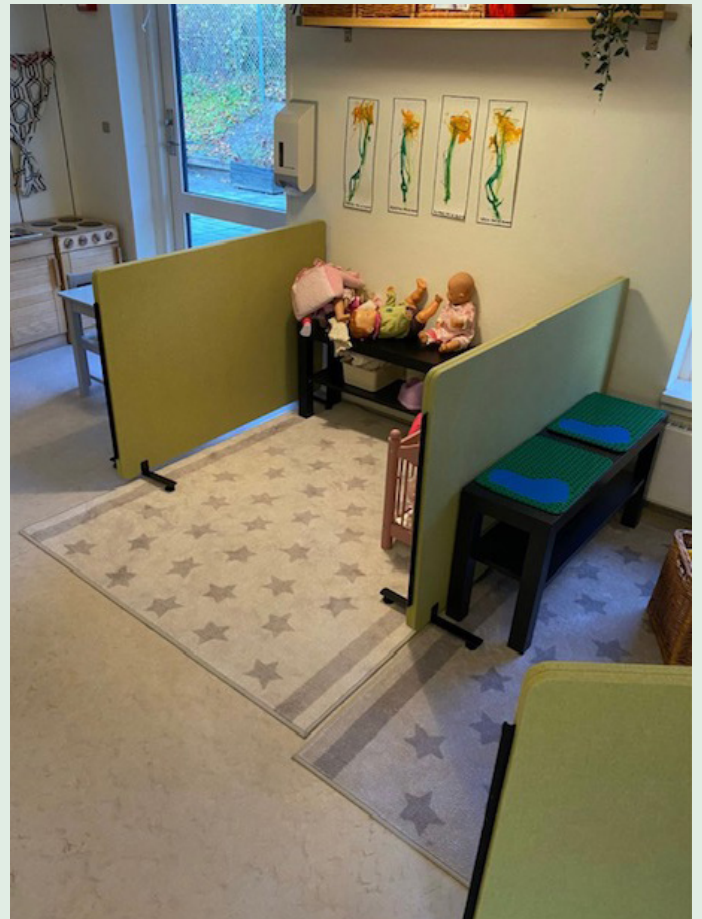

Floor panel for children

Dimensions h80 x w120 x d3 cm.

They excel in being able to be assembled in colors, rows, different angles, etc.

The panels come in sets of 3 pcs. per color incl. feet, wheels, and fixed feet with screw adjustment.

The floor panels are available in Antrazit, light gray, and green.

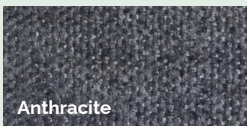

Setup

The panels come in sets of 3 pcs. per color with a robust Velcro pad at the ends. Thus, there are many different setup options depending on the function the panels are to have.

Special feet are included in case you wish to have the panels form 90° angles.

and practical way.

Custom FIT

Individual Workplace Adjustment

Your employees are different and work differently. With a Custom FIT, we review each employee's workplace with the aim of ensuring optimal working conditions for the individual.

A Custom FIT includes an ergonomic review of the employee's body position in the working situation, with special focus on the back and neck, where many experience problems. At the same time, we make measurements and observations in relation to air, light, and sound.

During the review, we primarily solve the challenges that can be handled with a better arrangement of the existing work tools. This may involve adjusting the chair, desk height, or rear-

anging items on the desk. In addition, we guide the employee on what they themselves can be aware of in relation to maintaining a good work posture.

After reviewing all employees' work situations, we compile a set of recommendations for the management with initiatives that will optimize the working conditions for each individual.

BONUS:

With all Custom FIT reviews, we provide a package with tools for light exercises throughout the work day.

Ergonomic Review

A review takes approximately 15-20 min. per employee. If something can be corrected on the spot, we do it together with the employee.
