Happiness at work

DESIGNED FOR  DANISH STANDARDS

# Pure Air Climate

Pure Air Climate is an advanced 3-in-1 climate solution that combines cooling air circulation, heating, and efficient air purification in one elegant, bladeless design. The product is developed to support a healthy and comfortable indoor climate year-round in professional environments and public buildings.

The bladeless technology ensures a smooth and comfortable airflow without visible fan blades, enhancing both comfort and operational reliability. Through oscillation (automatic side-to-side movement for even air distribution), the air is distributed more uniformly throughout the room, reducing direct airflow toward individuals.

At the same time, part of the air passes through the integrated HEPA13 filter with activated carbon (TVOC), where fine particles, odors, and VOCs are reduced before the air is returned to the room. This makes Pure Air Climate a safer alternative to traditional fans, which only recirculate existing air without filtration.

In healthcare, care, and institutional environments where specific requirements for hygiene and airflow apply, Pure Air Climate can serve as a supplement to mechanical ventilation systems.

Pure Air Climate can be used for cooling air circulation during warm periods and as a heat source during cold periods. The cooling effect is created by increased air movement around the body, contributing to improved thermal comfort without actively lowering the room temperature itself. This can result in a perceived temperature reduction of approximately 2–4°C for individuals in the airflow, which is well documented in indoor climate and thermal comfort research.

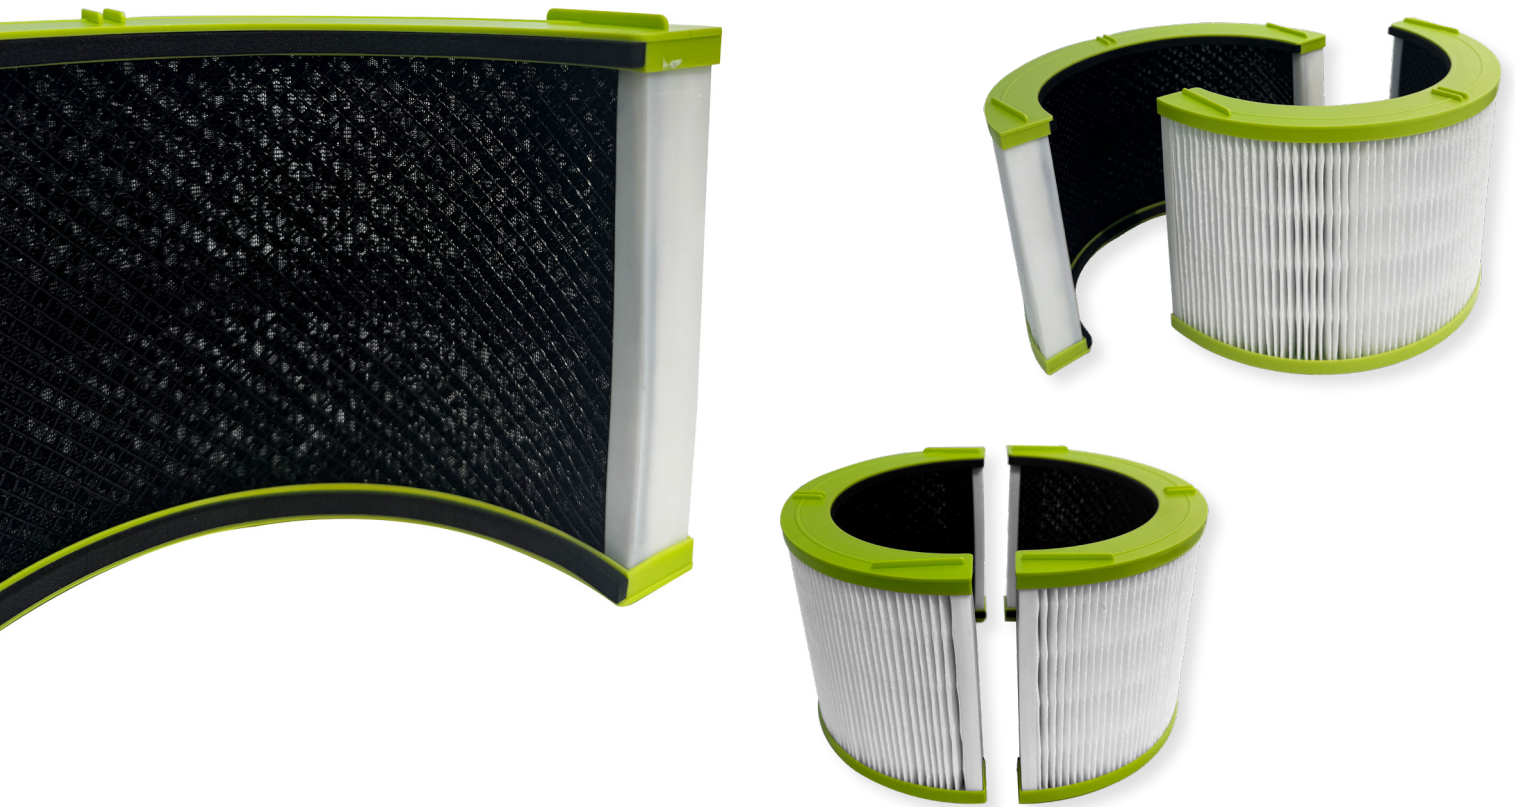

## Specifications

<b>Filter type:</b>	HEPA13 + activated carbon (TVOC)
<b>Activated carbon fiber:</b>	Yes
<b>Fan speeds:</b>	10 levels plus Max
<b>Noise level:</b>	26 to 55 dB
<b>Oscillation:</b>	80°
<b>Timer:</b>	1–9 hours
<b>Power consumption:</b>	– Cooling: 35 W – Heating: 1950 W
<b>Voltage:</b>	100–120 V / 220–240 V
<b>Frequency:</b>	50 / 60 Hz
<b>Product dimensions:</b>	265 × 265 × 865 mm
<b>Color:</b>	Black
<b>Application:</b>	Indoor use only
<b>Room size:</b>	35 m <sup>2</sup>
<b>Remote control:</b>	Yes

## Features

- Bladeless design for smooth and comfortable airflow
- Cooling air circulation, heating, and air purification in one product
- HEPA13 filter combined with activated carbon filter (TVOC)
- 10 fan speeds plus Max function
- Heating function with three levels: low, medium, and high
- 80° oscillation (automatic side-to-side movement for even air distribution)
- Timer function from 1 to 9 hours
- Low noise level
- Floor-standing model with compact footprint
- Manual operation without WiFi

#### Application and Recommended Room Size

Pure Air Climate is suitable for small to medium-sized rooms such as offices, treatment rooms, patient rooms, meeting rooms, and lounges.

**Recommended room size:** Up to approximately 35 m<sup>2</sup>.

Overall performance depends on room volume, ceiling height, layout, number of occupants, and interaction with existing ventilation systems.

#### PURE AIR CLIMATE – Filter

- **Filter type:** HEPA13 + activated carbon (TVOC)
- **Item number:** 70742
- Replaceable filter for the reduction of particles, odors, and VOCs.
- The filter should be replaced as needed, typically approximately every 4 months, depending on usage, load, and environment.

# Custom FIT

## Individual Workplace Adjustment

Your employees are different and work differently. With a Custom FIT, we review each employee's workplace with the aim of ensuring optimal working conditions for the individual.

A Custom FIT includes an ergonomic review of the employee's body position in the working situation, with special focus on the back and neck, where many experience problems. At the same time, we make measurements and observations in relation to air, light, and sound.

During the review, we primarily solve the challenges that can be handled with a better arrangement of the existing work tools. This may involve adjusting the chair, desk height, or rear-

ranging items on the desk. In addition, we guide the employee on what they themselves can be aware of in relation to maintaining a good work posture.

After reviewing all employees' work situations, we compile a set of recommendations for the management with initiatives that will optimize the working conditions for each individual.

### **BONUS:**

**With all Custom FIT reviews, we provide a package with tools for light exercises throughout the work day.**

### **Ergonomic Review**

A review takes approximately 15-20 min. per employee. If something can be corrected on the spot, we do it together with the employee.
