Full-Size Keyboard

Pairing Procedure

Press and hold the pairing button for 3 seconds; LED2 will flash blue at 1-second intervals. Once pairing is successful, LED2 will flash rapidly three times per second for 1 second, followed by six flashes. The maximum pairing time is 2 minutes; if pairing is not completed within 2 minutes, the keyboard will enter sleep mode.

Reconnection Indicator

Blue LED2 flashes rapidly three times per second for 1 second, repeating six times to indicate a successful reconnection. The reconnection process takes no longer than 5 seconds; if reconnection fails within 30 seconds, the Bluetooth indicator turns off and the keyboard enters sleep mode.

Charging Indicator

While the T/C is charging, the red power indicator LED1 remains lit; it turns off immediately once fully charged;

Low Battery Indicator: When the battery voltage drops below 3.3V, the red LED3 begins to flash at 0.5-second intervals; It turns off after flashing 10 times and will flash again when a key is pressed.

Numeric Keypad

Power-On Indicator

Press and hold the TAB key for 3 seconds to power on; LED2 lights up for 1 second and then turns off,

Pairing Procedure

Press and hold the ESC key for 3 seconds; the blue LED2 will flash at 1-second intervals. Once pairing is successful, the blue LED2 will flash rapidly three times in one second, repeating this pattern six times. The maximum pairing time is 2 minutes; if pairing is not completed within 2 minutes, the keyboard will enter sleep mode;

Reconnection Indicator

Blue LED2 flashes rapidly three times in one second, repeating six times, to indicate a successful reconnection. The reconnection process takes no more than 5 seconds; if reconnection fails within 30 seconds, the Bluetooth indicator turns off and the keyboard enters sleep mode.

Charging Indicator

When the T/C is charging, the power indicator LED1 (red) remains steadily lit; it turns off immediately once fully charged;

Low Battery Indicator: When the battery voltage drops below 3.3V, the blue LED2 begins to flash at 0.5-second intervals; After flashing 10 times, it turns off; it will flash again when a key is pressed

Keyboard Sleep Mode

If the keyboard is not paired within 3 minutes of powering on, it stops pairing and enters sleep mode.

After successful pairing and 30 minutes of inactivity, the keyboard enters sleep mode. Pressing any key immediately wakes the keyboard.

Activation

Press any key to activate the keyboard.

Sleep mode

The keyboard enters energy-saving sleep mode after 30 minutes of inactivity.

Technical Specifications

Keyboard Dimensions: 284 × 115 × 16 mm

Keyboard Weight: 404 g

Operating Voltage: DC 3.7 V

Operating Current: 3 mA

Low Battery Voltage Indicator (at 3.3 V): The red light flashes

Battery Life: 84 hours

System Compatibility: Compatible with Windows 7/8/10/11

Material: ABS plastic

Operating Temperature: 0 °C to 40 °C

Operating Humidity: 10% to 85% relative humidity at 25 °C
