MONITOR ARM TWIN

Happiness at work

DESIGNED FOR  DANISH STANDARDS

Monitor Arm Twin

Distance and angle to the computer screen are among the most important adjustments to help prevent long-term injuries in the neck and shoulder area. With the Monitor Arm Twin, you can freely adjust your screen's height, angle, and distance.

Ask our consultants for guidance on the correct adjustment of your screen.

Data overview

Weight	Approx. 4 kg
Material	Coated aluminium, PP plastic
Adjustmenttype	Mechanical spring
Mount type	VESA
Weight capacity	9 kg per arm
Screen size	Up to 30 inches
Connectiontype	USB A
Warranty	2 years

Tilt the screen to the angle that suits the light conditions and, if applicable, the transition in your glasses.

The screen height can be freely adjusted in relation to the desktop. This supports a more correct sitting posture with the head at the right angle. In addition, you gain extra desk space beneath the screen.

Rotate the screen freely in the desired direction. This provides many mounting options – and allows you to turn the screen towards a colleague to share your content.

Custom FIT

Individual Workplace Adjustment

Your employees are different and work differently. With a Custom FIT, we review each employee's workplace with the aim of ensuring optimal working conditions for the individual.

A Custom FIT includes an ergonomic review of the employee's body position in the working situation, with special focus on the back and neck, where many experience problems. At the same time, we make measurements and observations in relation to air, light, and sound.

During the review, we primarily solve the challenges that can be handled with a better arrangement of the existing work tools. This may involve adjusting the chair, desk height, or rear-

ranging items on the desk. In addition, we guide the employee on what they themselves can be aware of in relation to maintaining a good work posture.

After reviewing all employees' work situations, we compile a set of recommendations for the management with initiatives that will optimize the working conditions for each individual.

BONUS:

With all Custom FIT reviews, we provide a package with tools for light exercises throughout the work day.

Ergonomic Review

A review takes approximately 15-20 min. per employee. If something can be corrected on the spot, we do it together with the employee.
