SILENT ART

Acoustic panels in sound class A

DESIGNED FOR  DANISH STANDARDS

Silent Art

SilentArt are acoustic artworks that effectively reduce reverberation and improve room acoustics—without compromising on aesthetics or environmental responsibility. Our products are designed to combine functionality with artistic elegance, making them the ideal solution for both home and office. By investing in a SilentArt acoustic panel, you gain a noticeably better sound experience in any space while contributing to a more sustainable environment.

Sustainability and design

Our panels are made with 75% recycled aluminium and plastic. The acoustic boards are OEKO-TEX certified and consist of 68% recycled polyester, developed without harmful chemicals. The canvases are produced from 100% recycled materials and can be easily mounted in minimalist frames.

Healing architecture and top-class acoustics

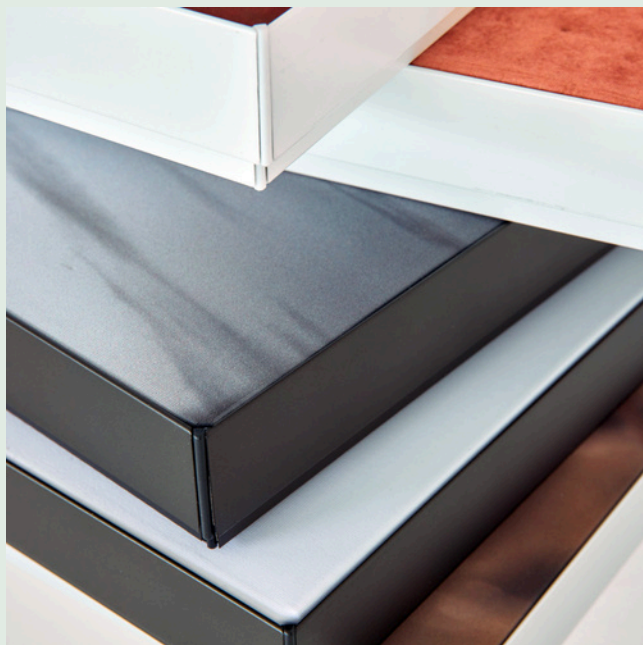

Multiple studies have shown how carefully chosen motifs and art on the walls can influence people's psychological and physiological state. Architectural elements such as sound, light, colour, and art play a crucial role in healing architecture—and ultimately in our shared well-being.

Find the right size and the perfect motif

Silent Art presents a wide selection of art photographs spanning various styles and themes, available in a range of sizes. Choose your size, your motif, and make your space remarkable today with Silent Art.

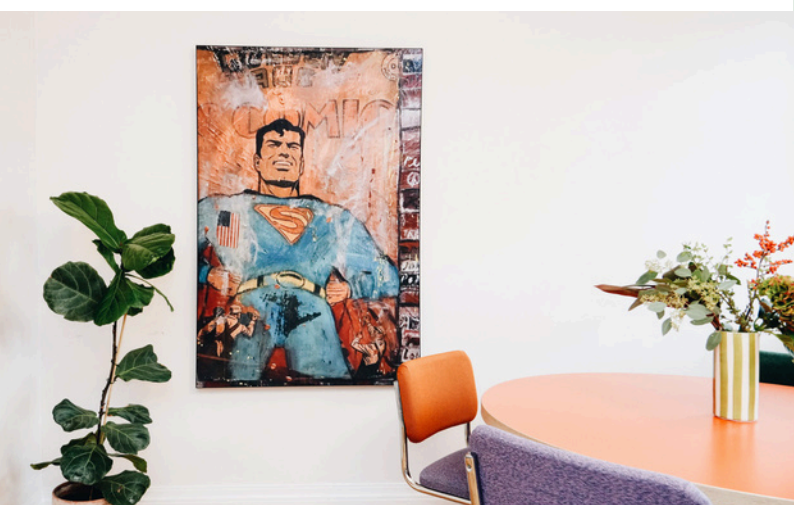

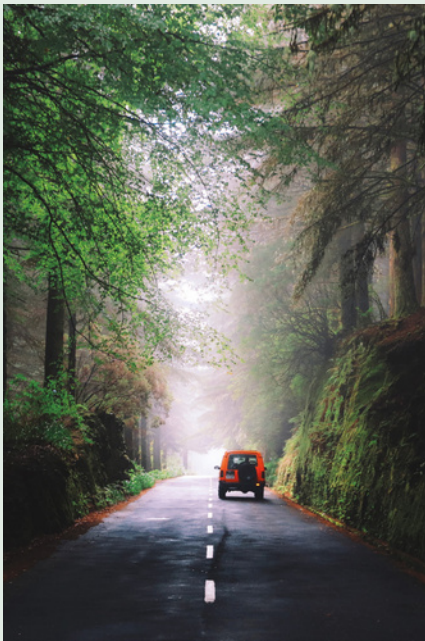

Discover [SilentArt.dk](https://silentart.dk) and find the perfect piece for your space

Even though modern architecture often includes sound-absorbing materials, countless buildings still benefit greatly from improved acoustics..

Custom FIT

Individual Workplace Adjustment

Your employees are different and work differently. With a Custom FIT, we review each employee's workplace with the aim of ensuring optimal working conditions for the individual.

A Custom FIT includes an ergonomic review of the employee's body position in the working situation, with special focus on the back and neck, where many experience problems. At the same time, we make measurements and observations in relation to air, light, and sound.

During the review, we primarily solve the challenges that can be handled with a better arrangement of the existing work tools. This may involve adjusting the chair, desk height, or rear-

ranging items on the desk. In addition, we guide the employee on what they themselves can be aware of in relation to maintaining a good work posture.

After reviewing all employees' work situations, we compile a set of recommendations for the management with initiatives that will optimize the working conditions for each individual.

BONUS:

With all Custom FIT reviews, we provide a package with tools for light exercises throughout the work day.

Ergonomic Review

A review takes approximately 15-20 min. per employee. If something can be corrected on the spot, we do it together with the employee.
