# VERTICAL BT MOUSE

Happiness at work

DESIGNED FOR  DANISH STANDARDS

# Vertical BT mouse

Vertical BTmouse is ergonomically designed to help prevent mouse arm or carpal tunnel syndrome (CTS), injuries that often occur from repetitive movements during computer work.

Muscle pain in the shoulders and forearms is caused by muscles being tense for extended periods of time. This restricts blood circulation in the muscles and leads to pain.

Shortcut buttons for web navigation and cursor speed adjustment on the side of the mouse make it extra efficient to work with.

The design of the mouse and the placement of the buttons make it very comfortable to work with and help prevent the development of 'mouse arm,' a term that covers a wide range of repetitive strain injuries caused by monotonous, repetitive working positions.

By holding the mouse diagonally, you avoid compressing the median nerve in the wrist and reduce the risk of developing carpal tunnel syndrome, which can be very painful.

## Data overview

Dimensions	109 x 78 x 68 mm
Transmission distance	10 m
Weight	85 g (without battery)
Cursor speed	800/1200/1600 DPI
System requirements	
For 2.4 GHz og BT 3.0:	Win XP, Win 7/8/10, Mac OS, IOS 13 og over, Android
For BT 5.0:	Win 8/10, Max OS, IOS 13 and over, Android

The Vertical BT Mouse can connect to all types of devices, either via Bluetooth or USB connection.

# Custom FIT

## Individual Workplace Adjustment

Your employees are different and work differently. With a Custom FIT, we review each employee's workplace with the aim of ensuring optimal working conditions for the individual.

A Custom FIT includes an ergonomic review of the employee's body position in the working situation, with special focus on the back and neck, where many experience problems. At the same time, we make measurements and observations in relation to air, light, and sound.

During the review, we primarily solve the challenges that can be handled with a better arrangement of the existing work tools. This may involve adjusting the chair, desk height, or rear-

ranging items on the desk. In addition, we guide the employee on what they themselves can be aware of in relation to maintaining a good work posture.

After reviewing all employees' work situations, we compile a set of recommendations for the management with initiatives that will optimize the working conditions for each individual.

### **BONUS:**

**With all Custom FIT reviews, we provide a package with tools for light exercises throughout the work day.**

### **Ergonomic Review**

A review takes approximately 15-20 min. per employee.  
If something can be corrected on the spot, we do it together with the employee.
